Prabhash Thakur

Senior Data Engineer | Snowflake, dbt & Data Architecture

+91 8759480218 | thakurprabhash80@gmail.com | linkedin.com/in/imprabhash

PROFESSIONAL SUMMARY

Snowflake and dbt specialist with 8+ years in data engineering and analytics. Experience includes client project architecture, ETL/ELT pipelines, Data Mesh, data quality and access controls.

SKILLS

Data Platforms: Snowflake, dbt, SQL, Python, Azure Data Factory, Databricks, Azure Data Lake, AWS S3, Airflow, Jinja, ETL/ELT Pipeline Design, Data Warehouse Architecture

Architecture & Governance: Data Mesh, Medallion Architecture, Data Vault Modeling, Dimensional Modeling, Star Schema, Data Quality Frameworks, dbt-expectations, Row-Level Security (RLS), Role-Based Access Control (RBAC), Dynamic Data Masking, Data Governance, Data Lineage, CI/CD for dbt, Azure DevOps, Git

Reporting & Automation: Power BI, DAX, M Query, Power Automate, PowerApps, Azure Logic Apps, Azure Functions, SAP BW, SAP HANA

Leadership & Delivery: Team Leadership, Mentoring, Stakeholder Management, Sprint Planning, Code Reviews

Snowflake AI: Cortex Search, Cortex Analyst, Cortex Agents, Cortex LLM Functions, AI_PARSE_DOCUMENT, Document AI, Cortex Fine-Tuning, Retrieval-Augmented Generation (RAG), Streamlit in Snowflake

WORK EXPERIENCE

Senior Lead Engineer

July 2025 - Present

KIPI.AI

- Work on Data Mesh in Snowflake as an individual contributor for KIPI's largest client, supporting data products across **5+ domains** serving **around 200 users**.
- Cut ingestion compute costs by **60%** for **over 1 TB daily** through incremental loads, micro-batching and revised slowly changing dimension (SCD) Type 2 logic, moving from an L to an **XS warehouse**.
- Wrote dbt macros to purge stale snapshots automatically, cutting storage and processing overhead by **around 40%**.
- Established coding standards, pull request reviews, Git branching rules and naming conventions.
- Applied Snowflake **Row-Level Security (RLS)** and developed a personally identifiable information (PII) scanner to flag missing RLS or masking policies across data products and alert domain owners.
- Created a **dbt audit package** from scratch with metadata discovery, batched SQL checks, pass/fail results and 90-day retention to flag Snowflake account data missing row access policies.
- Implemented the dbt-expectations data quality layer and continue to expand governance as new domains join.
- Run weekly code walkthroughs and sessions on architecture and development practices.
- Used Cortex Search and COMPLETE for RAG Q&A, and Document AI and AI_PARSE_DOCUMENT for extraction.
- Worked with Cortex Analyst for natural-language queries, Cortex LLM functions for classification, sentiment analysis and information extraction, and Cortex Fine-Tuning for model customization.

Senior Technical Lead

June 2023 - July 2025

Beyond Key

- Designed **three client project architectures**: logistics on Snowflake, a Databricks project and a pet insurance project.
- Delivered a Snowflake migration for a logistics company and led the client project team.
- Implemented dbt from scratch and designed its transformation architecture.
- Developed Snowflake and dbt ETL pipelines with Azure Data Factory (ADF) to extract source data and automate stage and table creation.
- Wrote dbt macros for failed-model error logs and insert/update timestamps, plus relationship tests for referential integrity.

- Automated stage and pipe creation through Snowflake JavaScript procedures using configuration entries.
- Redesigned ADF extraction pipelines for simpler, more flexible processing.
- Configured Snowflake shares for vendors and created export tasks.
- Led an internal proof of concept for Beyond Key's Snowflake practice and delivered internal Snowflake and dbt training.
- Learned and tested Cortex Search, Cortex Analyst and Cortex Agents.

Senior Data Engineer

June 2021 - June 2023

Visual BI Solutions (an Atos Company)

- Delivered Snowflake and dbt ETL solutions and wrote reusable SCD Type 1 and Type 2 macros, including tables with both column types.
- Prototyped and implemented a client solution for null primary keys from late-arriving records on the right side of left joins.
- Created and enhanced table, view, incremental and ephemeral models, plus snapshots; tested existing code during dbt upgrades.
- Added dbt tests for region filters and source-to-target row counts; managed code versions in Azure DevOps Git.
- Implemented a process to rebuild historical changes and recover from data loss.
- Used SQL common table expressions (CTEs) to cleanse and transform data and create tables.
- Overrode global dbt macros to select drop/recreate or truncate/reload during full-refresh using a variable.
- Automated Snowflake user and role creation with PowerApps, Power Automate and Azure Functions for internal Center of Excellence (COE) work.
- Produced a COE Power BI report for Snowflake warehouse usage recommendations.
- Completed corporate ADF training and created an internal COE pipeline to ingest MSFT stock prices every minute and store each 5-minute high in Azure SQL.
- Used basic Python file handling for daily dbt tasks.

Software Engineer

March 2018 - May 2021

Tech Mahindra Ltd.

- Worked with Snowflake as part of data engineering work.
- Implemented SAP BW data cleansing using ADSOs, DSOs and Composite Providers.
- Created calculation views for complex data processing requirements.
- Developed and updated Power BI dashboards.
- Used M Query for data preparation, complex calculations and joins.
- Wrote DAX calculations for Power BI reports.
- Automated data processing with SAP BW Process Chains and monitored their execution.
- Transported data flows to production using change requests and transport requests.

CERTIFICATIONS

- SnowPro Specialty: Gen AI Certification - Snowflake
- SnowPro Advanced Data Architect - Snowflake
- dbt Developer Certification - dbt Labs
- SnowPro Advanced Data Engineer - Snowflake
- SnowPro Core Certification - Snowflake
- Astronomer Certification for Apache Airflow 3 Fundamentals - Astronomer
- Microsoft Certified Data Analyst (DA-100) - Microsoft
- Azure Data Fundamentals (DP-900) - Microsoft

EDUCATION

Bachelor of Technology (B.Tech) – Kalyani Government Engineering College, Kalyani, West Bengal | 2013-2017 | 7.28 DGPA

RECOGNITION

- Star Performer Award (2x), Pinnacle Award and PAT ON BACK Award for client delivery.
- Ninja Squad (2x) and Eagle Squad recognition for technical problem-solving and team delivery; multiple client commendations for leadership.
