PROFILE

Senior Technical Lead with overall 6+ Years of IT experience in Data Engineering. Certified Snwoflake and DBT Developer, ADF. Also Having Experience with Azure Data Lake, Databricks, Azure Blob Storage, Azure Logic apps, Power BI, Power Automate,PowerApps.

WORK EXPERIENCE

Senior Technical Lead

Beyond Key — June 2023 - Present

- Working as Senior Technical Lead
- Successfully delivered Snowflake migration project for a logistics company.
- Conducted Snowflake training for internal employee.
- Provided ETL Solution using Snowflake and dbt.
- Leading the team in client project
- Implemented dbt in client project from the scratch.
- Created ADF Pipeline to pull data from various sources.
- Created macros:
  - To log errors of the failed model.
  - To handle inserted timestamp and updated timestamp of the entry.
- Written custom dbt test cases to handle relationship test cases for data integrity.
- Designed whole architecture of dbt implementation.
- Led Internal POC for Beyond Key snowflake Practices.
- Provided internal training on Snowflake and dbt.
- Worked on writing snowflake JavaScript procedure to handle complex scenario like automating stage and pipe creation based on the entry.
- Created Export task to export data from snowflake.
- Worked on creating Shares from client snowflake account to share data to different vendor.
- Created ADF Pipeline to automate stage and table creation for the data being extracted from source.
- Redesigned existing ADF Pipeline to make it simpler and more flexible for data extraction.

Senior Data Engineer

Visual BI Solutions (an Atos Comapny) — June 2021 - June 2023

- Worked as Senior Data Engineer.
- Provided ETL Solution using Snowflake and dbt.
- Created macros:
  - To provide dynamic solution to complex requirements.
  - Dynamic handling of complex table containing scd type 1 and type 2 columns as well as tables with combination of both types of columns.
- Created Complex POCs (e.g., Resolving Null Value for late arriving records in a PK Column from right table in left join) for the client and implemented successfully. Working experience with almost all materialization in dbt(Table, View, Incremental, Snapshot, Ephemeral).
- Responsible for updating dbt versions from time to time and testing impact of new version on current codes.
- Written dbt tests scripts to test data quality(e.g. Table having data only for required Region, Target count is matching source count etc).

CERTIFICATIONS

- SnowPro Core Certification by Snowflake
- dbt Developer
- Microsoft Certified Data Analyst (DA100)
- Azure Data Fundamentals(DP900)

- Version management using Azure Devops Git.
- Responsible for creating new models and enhancing existing models.
- Implemented Solution to rebuild History Changes to save from any loss due to disaster.
- Highly Experienced with Advanced SQL Concepts and Very much comfortable to manipulate data using CTE.
- Overwritten global macros to resolve business requirement (e.g., modifying default full-refresh functionality to be based on the variable passed for drop and recreate vs truncate and reload).
- Provided complex solutions to clean the data and create the table.
- Participated in COE activities:
- Developed solution to automate user and role creation for snowflake using PowerApps, Power Automate and Azure Function.
- Power BI Report for Data Warehouse recommendation for snowflake usage
- Streaming MSFT Stock price using ADF every minute and storing highest price for each 5-minute window in MS SQL DB.
- Got Corporate Training for Azure Data Factory and Worked on Internal COE to Update max price of MSFT Stock within every 5-minute Window Data into Azure SQL Database
- I also have experience with Basic file handling using Python to help my daily dbt activities.

Software Engineer

Tech Mahindra Ltd. Mar 2018 - May 2021

- Worked on SAP BW
- Implemented various solution to clean the data using ADSO, DSO, Composite Providers and automated the process using Process chains.
- Created calculation views to implement complex solutions.
- Created and updated Power BI Dashboard.
- Worked on complex calculations and joins using M Query language and Dax.
- Creating and monitoring Process Chains.
- Transporting Data Flows to Production using Changes request and Transport Request.

PROJECT ACHIEVEMENTS

- Received appreciation on my Leadership Skills.
- Received appreciation for consulting approach with client.
- Awarded with “Pat on the Back” for my hard work, dedication and professionalism for the project.
- Awarded Ninja Squad and Eagle Squad to the Project Team members for the solution provided in Project.
- Received many appreciations from client for putting extra hours, providing complex solutions and giving quick solutions to urgent requirements.
